### **Notice**

Sewer construction has begun on the Concord Township Sewer Department: Colonial Village Sewer Project.

The construction of this force main will allow your property to connect to the public sewer system. At this point in time, property owners adjacent to the new sewer force main can specify the location of the lateral for their property. For the construction crews to place the lateral in the proper location, we are asking all property owners to place the attached flag 5' off the edge of the road at a location that will best suit them. When the crew installs the sewer main, a lateral will be extended to the property line or edge of the right-of-way at the location of the flag. It is recommended that you contact a plumber as soon as possible if further assistance is needed.

The Sewer Department will do their best to accommodate all location requests. If the lateral cannot be placed at the specified location, field personnel will contact you with further instructions or information.

If there are any questions, please contact the field engineer from Bradford Engineering Associates, Inc. – Brad Stuart at 610-969-8708.

**\*\* Please Note: Your home is designed for a pump system.**
